How a Personal Attack Alarm can help protect you

- A personal attack alarm, is intended to shock and disorientate an attacker, giving you time to get away and call for help.
- An effective attack alarm is easy to carry and loud enough to shock any potential attacker, compact and versatile the attack alarm is intended to meet these needs, and still be value for money.

Choosing your Personal Attack Alarm

- The Attack Alarm should be easy to carry and easy to reach if you ever need it.
- You should be able to operate it comfortably and quickly.
- Fits in your bag, in the palm of your hand and on your key-ring.
- Easily operated by pulling the ripcord

Purchase a Personal Attack Alarm today because -

- They come with fitted batteries and a 1 year guarantee.
- They are manufactured from high quality and robust materials
- The cost is competitive and the cost is less than a cab ride home but could give you the edge when you need it.

Is a Personal Attack Alarm enough on its own?

You should not rely on a personal attack alarm on its own as a way to attract help or scare an attacker off, there might not be anyone around to hear it, and even then it might be ignored or mistaken for a car alarm.

A personal attack alarm should be a part of your overall personal safety plan, and you should always be aware of your surroundings when out alone, especially at night.
